

As a flight attendant I feel that it is imperative to not allow the use of cell phones in any manner during flight. It is difficult to make people follow all FAA rules now, if cell phone use is added it will be impossible. Not to mention the annoyance factor. An airplane is just not an appropriate forum for people to be talking on cell phones or having them ring. It will be an absolute mistake to allow this. People just have to realize that while on aircraft phones are not to be used. Thank you.
